The Smart Reset Controller (SRC) receives data from the Manifold Controller(s) and helps distribute and modulate water temperatures based on those needs. The SRC must be installed inside Warmsource after it has been properly installed and mounted. Follow these steps and refer to the complete installation guide for additional information.
After Warmsource has been properly installed and mounted, fasten the Smart Reset Controller (SRC) into the mounting bracket located in the lower portion of Warmsource.

1. Remove the Warmsource cover, then fasten the SRC to the mounting bracket using the screws provided.

2. Connect the power cord from the top half of the unit to the “Boiler” port, and the power cables from the pump(s) to the appropriate port.

3. Attach the 4-wire connectors to the appropriate ports on the SRC (Boiler, Supply and Return). If connecting Air Conditioning, run wire from the AC Unit(s) and connect to the “AC1/Fan” port.

4. Connect the power cable from the bottom of the SRC unit to an external 120v outlet, and replace the cover.
FCC Compliance Statement
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. When using this device, a distance of 20cm to the user should always be maintained.

This radio transmitter (24839-WBR01) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device. When using this device, a distance of 20cm to the user should always be maintained. 2.2dBi dipole antenna.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada’s licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent émetteur radio (24839-WBR01) a été approuvé par Industrie Canada pour fonctionner avec les types d’antenne énumérés ci-dessous et ayant un gain admissible maximal et l’impédance requise pour chaque type d’antenne. Les types d’antenne non inclus dans cette liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l’exploitation de l’émetteur. Lors de l’utilisation de cet appareil, une distance de 20 cm par rapport à l’utilisateur doit toujours être maintenue. Antenne dipôle 2.2dBi.

Cet appareil contient des émetteurs / récepteurs exemptés de licence conformes aux RSS (RSS) d’Innovation, Sciences et Développement économique Canada. Le fonctionnement est soumis aux deux conditions suivantes:

1. Cet appareil ne doit pas causer d’interférences.
2. Cet appareil doit accepter toutes les interférences, y compris celles susceptibles de provoquer un fonctionnement indésirable de l’appareil.
