

Warmboard-R Specification

PRODUCT DESCRIPTION

Warmboard-R is a hydronic radiant panel manufactured from oriented strand board (OSB) with a conductive aluminum top skin bonded to the entire top surface.

Each panel includes a series of conductive aluminum channels on the top surface composed of straight and turn patterns to accommodate the installation of pex tubing.

All panels can be installed over existing concrete or subfloor.

Specifications			
Dimensions	13/16" thick, 2' x 4'		
Weight	3.2 lb/sf. (includes panel, tubing, water)		
Panel Types	Straight, Turn	Tubing size	1/2"
Surface Material	.025" thick 1060 aluminum alloy
